

# Upcoming work in Katanning

## Katanning to Kojonup pipeline Replacement – May 2023

### What is happening?

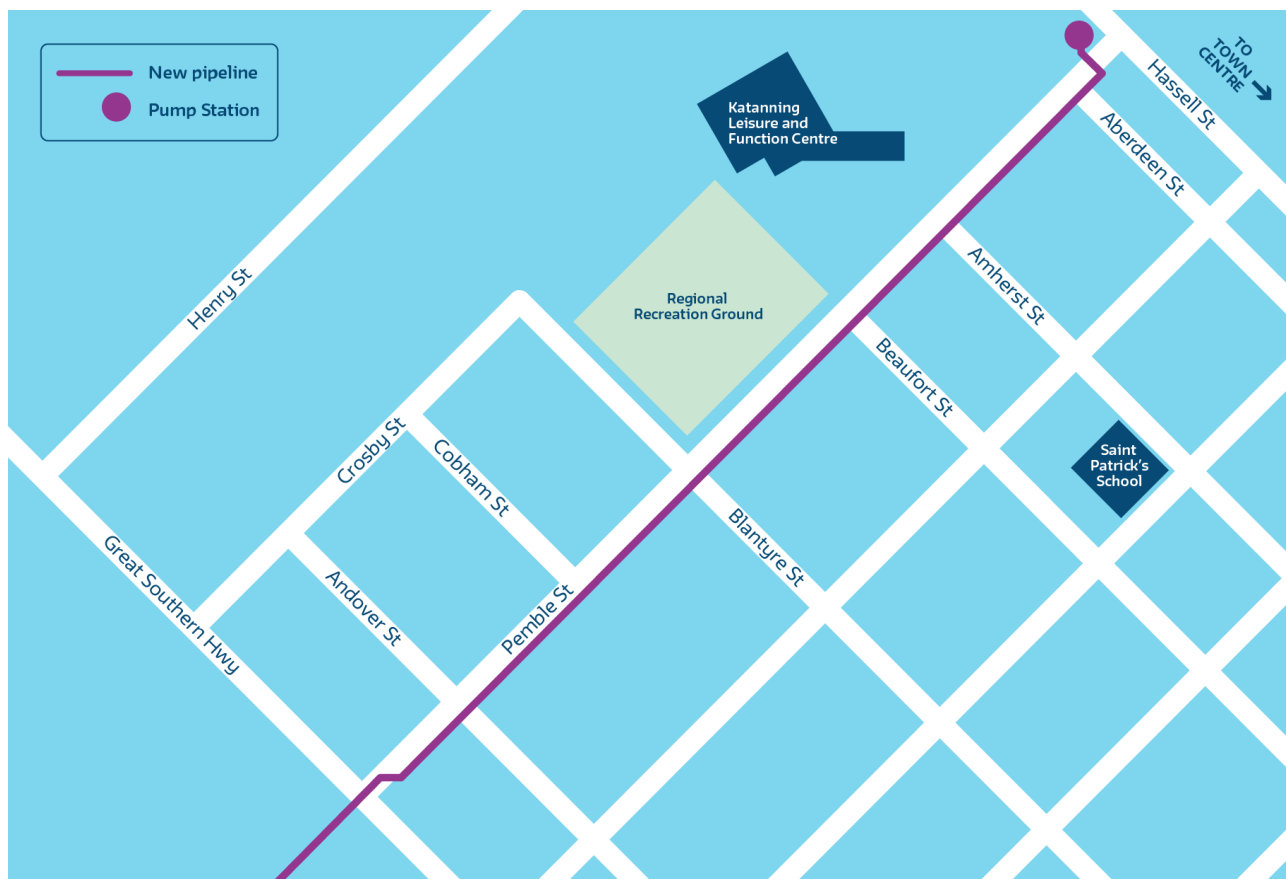

Water Corporation's authorised contractor Benang Energy Infrastructure, will shortly begin work to replace 2.2 km of the Katanning to Kojonup pipeline in Katanning. The work is being undertaken to reduce the risk of future leaks and breaks and will increase the reliability of water supply to customers.

### When is this happening?

Construction has been delayed slightly and will now begin late in May or early June. The work will take between 6 to 8 months, depending on factors such as ground and weather conditions.

### Where is the work taking place?

Work will occur between the Pemble Street pump station, near Hassell Street, and Kojonup-Katanning Road (refer to map below). Work will mostly occur in the verge on the southern side of Pemble Street, Katanning. Access to verges will be required for the work. Work will be undertaken in a staged or progressive approach.

Map 1: New Pemble Street pipe alignment.

## Katanning to Kojonup pipeline Replacement – May 2023

Map 2: New Kojonup-Katanning Road pipe alignment.

### How will this impact me?

The work will require open excavation to place the new pipeline. During the work, properties on the southern side of Pemble Street may have reduced access to their verge and driveways. Single lane road closures will be required along the southern side of Pemble street throughout the work. Shorter road closures will be required at intersections with Pemble Street as work progresses.

There will be an increase in noise, dust and activity during construction. Other impacts may include increased traffic and local road/pedestrian detours.

### How will impacts be managed?

Residents with access via Pemble street will be notified before work impacting your access begins. Access during periods of work may be restricted. Our contractor will endeavour to keep you informed throughout the work to minimise access issues. Reinstatements of the verge, driveways and roads will be undertaken either during or following the work.

### How can I get more information?

For project information or to subscribe to project updates by email visit the project webpage: <https://www.watercorporation.com.au/katanningkojonup>
